Professional Summary

Backend-focused developer with 7+ years of experience building scalable web systems, automation workflows, custom plugins, and API integrations. Strong background in PHP, WordPress backend development, database optimization, and business logic implementation.

Currently transitioning into Python backend development with a focus on FastAPI, APIs, automation systems, and AI-integrated applications. Experienced in solving real-world backend problems, integrating third-party services, and building maintainable systems for production environments.

Technical Skills

Backend Development

- Python (FastAPI, REST APIs)
- PHP
- WordPress Plugin Development
- REST API Development & Integration
- Backend Architecture & Business Logic
- Authentication & Authorization
- Cron Jobs & Background Tasks

Databases

- MySQL
- SQLite
- Database Design
- Query Optimization

Integrations & Automation

- Payment Gateway Integration (Stripe, Razorpay)
- Third-party API Integration

- Webhooks
- Automation Workflows
- Data Synchronization Systems

Tools & Platforms

- Git & GitHub
- Postman
- Linux / cPanel / VPS
- Docker (Basic)
- VS Code

Frontend (Basic Working Knowledge)

- HTML
- CSS
- JavaScript
- React (Basic)

Professional Experience

Software Engineer – WordPress Backend Developer

Houzeo

 Dec 2021 – Dec 2024

- Worked on backend-focused WordPress development for a large-scale real estate platform
- Developed and maintained custom plugins, backend workflows, and internal system functionality
- Built and optimized API integrations, business logic, and automation features
- Worked on performance improvements, debugging, and production issue resolution
- Collaborated with engineering teams on scalable backend implementations

Software Engineer

Kilowatt

 Jan 2025 – Jul 2025

- Worked on backend development and custom web solutions
- Contributed to API integrations, backend workflows, and application functionality
- Collaborated with development teams on scalable project implementations

Software Engineer

EC-Council

 Jul 2025 – Sept 2025

- Worked on backend-focused development tasks and system enhancements
- Assisted in implementing scalable functionality and maintaining production systems
- Collaborated with internal teams on feature development and technical improvements

Backend Developer

CodingDiv

 Sept 2025 – Present

- Working on backend development for client projects with a focus on scalable functionality and integrations
- Contributed to the development of HorseyPeople.com.au, including backend workflows and system functionality
- Handling custom development, integrations, and backend problem-solving for production environments

Projects

AI Content Generation API (Python + FastAPI)

- Built a backend API that generates structured content using AI APIs
- Implemented request validation, API routing, and response handling
- Added logging and modular backend architecture for maintainability

Vehicle Listing Automation Tool

- Developed a backend system that generates optimized vehicle sale listings for platforms like OLX and Facebook Marketplace
- Implemented pricing logic and text generation workflows
- Designed APIs for reusable listing generation

Custom WordPress Automation Plugin

- Built a plugin handling automation workflows, API integrations, and background processing
 - Integrated payment gateways and external systems for automated operations
 - Improved backend efficiency using optimized queries and caching strategies
-

Education

Bachelor of Commerce: Completed in 2011

Learning & Development

- Self-taught developer with hands-on learning through online resources, YouTube, documentation, and real-world practice
 - Continuously learning backend engineering, Python, APIs, and AI-integrated systems through self-study and project-based development
-

Additional Information

- Open to Remote / Work From Home opportunities
- Interested in Backend Engineering, AI-integrated systems, and scalable API development
- Strong problem-solving and self-learning ability with experience working independently on production systems
