PROFESSIONAL SUMMARY

Backend Engineer with 7+ years of experience building production software, backend APIs, workflow automation platforms, and enterprise applications.

Recently focused on developing AI-powered backend applications using FastAPI, OpenAI, Ollama, prompt engineering, and modern REST APIs to automate business processes and improve operational efficiency.

Experienced in integrating LLMs into production workflows, designing backend architectures, orchestrating AI services, and developing scalable automation systems combining traditional backend engineering with Generative AI.

Strong background in Linux, PostgreSQL, API integrations, business automation, and production engineering.

PROFESSIONAL EXPERIENCE

Backend Developer

Coding Diver

September 2025 – Present

Designed backend systems and automation tools for production WooCommerce platforms.

Developed:

Inventory Automation

Shopify Synchronization

Database Management

Order Automation

Backend Plugins

Operational Systems

Software Engineer

EC-Council

July 2025 – September 2025

Maintained enterprise web platforms.

Implemented backend features.

Delivered production enhancements.

Resolved critical production issues.

Software Engineer

Nordic Intent

January 2025 – July 2025

Developed backend integrations for enterprise clients.

Implemented CRM synchronization.

Built backend dashboards.

Integrated WooCommerce with business systems.

Backend Engineer

Houzeo

December 2021 – December 2024

Designed backend systems supporting one of America's largest PropTech companies.

Major contributions included

Backend workflow automation

Publishing platform enhancements

Property synchronization

Google Maps integrations

Performance optimization

Editorial automation

Chrome Extension development

Improved Core Web Vitals

40

↓

98

Reduced production database queries

5 seconds

↓

0.004 seconds

Supported backend operations for approximately 60 editorial users.

AI PROJECTS

AI Resume Tailor

Purpose

Automatically customize resumes using AI according to job descriptions.

Technologies

FastAPI
